

“Ensuring your safety”

Why should I have my electrical system tested?

- Nearly 40% of homes in the U.K. date back to before 1945, making their wiring several decades old and requiring renewal.
- Cables, switches, sockets and all other outlets deteriorate with use and must be periodically inspected.
- According to government figures around 10% of domestic fires are electrical, and of these a third are a direct result of old or bad wiring.
- If your property needs a rewire it is a good opportunity to have additional sockets and switches installed to make your life easier, you may choose:
 - Additional sockets in your kitchen, lounge hallway or bedrooms.
 - Sockets or lights in your garage/outbuildings.
 - Wall lights instead of. or as well as, ceiling lights.
 - Mains powered doorbell.
 - Extractor fan in your kitchen or bathroom.

Why choose EEC Electrical to ensure my domestic electrical situation is safe?

- The EEC group has been providing a first-class service for its clients since 1985.
- EEC only employ qualified electricians.
- All work is guaranteed.
- Highly efficient and dedicated customer support department.
- EEC will refund the client the cost of the electrical test.

Providing peace of mind...

What will it cost to achieve piece of mind that my electrical system is safe?

EEC electrical charges a one-off fee to complete a full electrical test of your home. This fee is fully inclusive of both labour and vat charges.

What do I receive for my electrical test fee?

EEC electrical pride themselves on the quality of service and expertise they provide, and having wisely commissioned an electrical test of your home you will receive:

- A Courtesy call from our service department to arrange a confident time and date for your test to be completed.
- A full inspection of your home's electrical system by one of EEC's own fully qualified electrical engineers.
- A detailed inspection certificate listing the condition of the electrical system in your home.
- In event that your electrical system requires either repair or replacement EEC will be happy to provide a no obligation quotation.
- Should you decidethat you wish EEC electrical to carry out required works to your electrical system, EEC will ensure that all work is fully completed tto the highest standards by our own fully qualified electricians.
- EEC electrical operate a unique test refund scheme allowing you to receive a full refund of your original test free against any essential work to your electrical system carried out by EEC electrical.
- Unlike most companies EEC do not charge an additional re-test fee once the work has been completed.
- EEC electrical guarantee all work.
